

official opening
of the

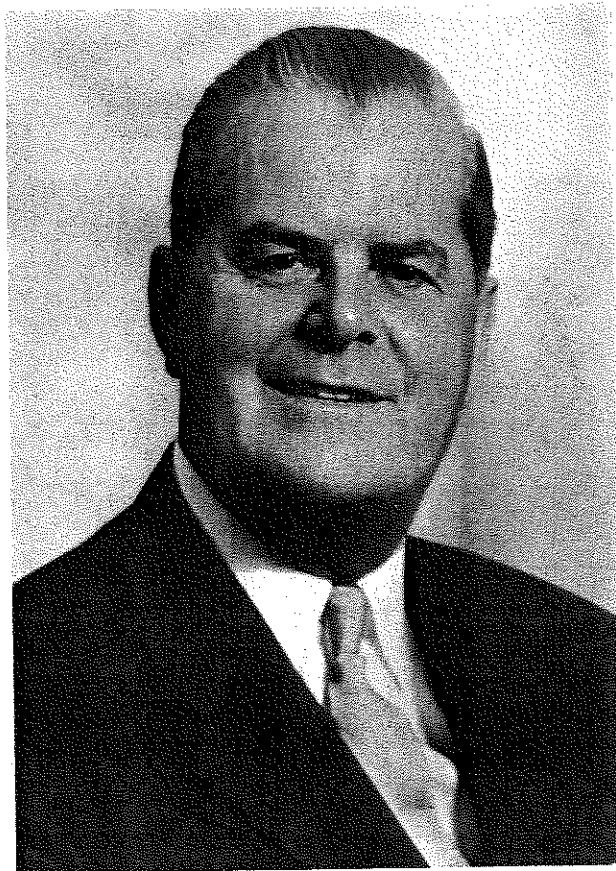

**BRITISH COLUMBIA
VOCATIONAL SCHOOL**

TERRACE

5330 McConnell Avenue
Terrace, British Columbia

August 11, 1970

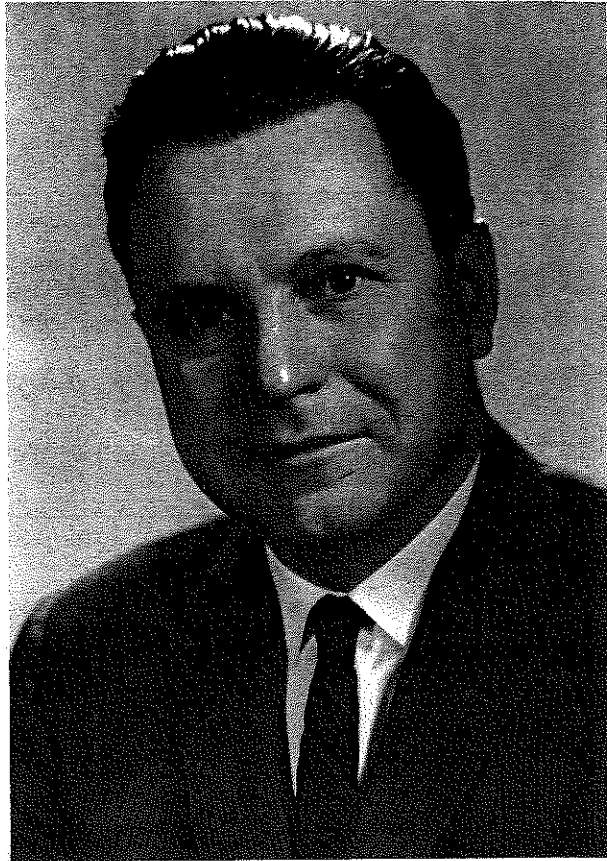

2:30 p. m.

The Honourable W.A.C. BENNETT, P.C., LL.D.,
D. POL. SC., K. St. J.
*Premier and Minister of Finance
Province of British Columbia*

"British Columbia's regional vocational schools are designed primarily to equip our young men and women with the skills required in whatever branch of commerce, industry or the service occupations that they choose to enter. An equally important function is to provide an opportunity for members of the work force to upgrade their skills or take new training that might be required if they are to keep pace with changing techniques and methods.

"I extend sincere greetings to all the students, staff members and advisory committee members, in fact to all those who are and have been associated with the British Columbia Vocational School, Terrace. May their initial success be even greater in the years to come."

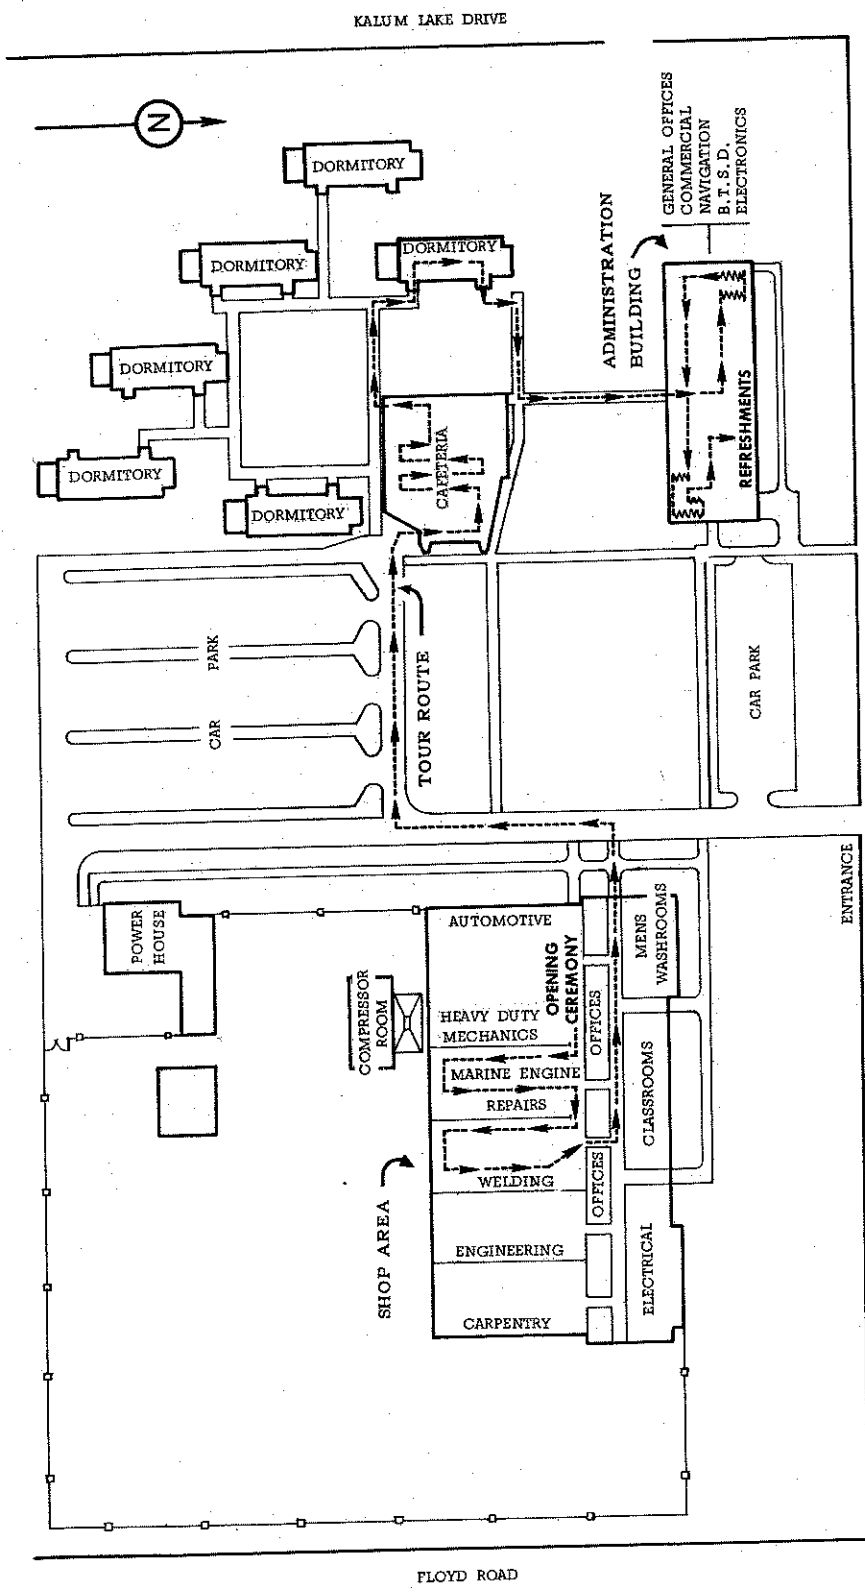

The Honourable ALLAN J. MacEACHEN, P.C., M.P.
Minister of Manpower and Immigration, Canada

"The British Columbia Vocational School, Terrace, is the product of a cost-sharing agreement between the Province of British Columbia and Canada. The Government of Canada is pleased to participate because it recognizes that there is no task more important —to individual employees and employers, governments at all levels and the nation as a whole —than a high level of education and skill development for the total work force.

"I extend my greetings and best wishes, both from myself and my colleagues in the Government, to all those who were instrumental in the creation of this school and to those whose efforts, in a comparatively short period, have brought it to its present high standards."

Ladies' and Gentlemen's restrooms are located off the main corridor in the shop area and on both floors in the Administration Building.

The First Aid Station is located off the corridor in the Main Shop area.

FLOYD ROAD

THE BRITISH COLUMBIA VOCATIONAL SCHOOL TERRACE

The success of British Columbia's vocational training programme is due very largely to the fact that a number of agencies, all vitally interested in the development of a skilled labour force, cooperate in the planning and operation of each school.

While the Terrace Vocational School was designed, and its construction supervised, by the British Columbia Department of Public Works, a Site Selection Advisory Committee was of invaluable assistance. It consisted of representatives of the Technical and Vocational Training Branch of the Department of Education, a representative of the Federal and Provincial Departments of Labour and representatives of the trade union movement and of business management.

Advisory committees, established to assist school authorities in determining the kind of training required by industry and the content of the various courses, have been established for the various training programmes. They too have a broad representation from the Departments of Education and Labour, the Federal Department of Manpower and Immigration, labour and management.

OBJECTIVE OF THE SCHOOL

The objective of the school is to train men and women in the fields of their choosing so that they may be able to enter business or industry, not as fully qualified personnel, but with sufficient practical experience, related knowledge, and academic background to make them useful and productive workers on commencement of employment. In addition, these facilities are used to upgrade the skills and related knowledge of persons presently employed and to retrain those people who have become unemployed due to technological change.

TRAINING PROGRAMMES

PRE-EMPLOYMENT: A range of courses are offered within the spectrum of job classifications to meet student aspirations and the needs of business and industry. They provide a foundation for entry into a new occupation and a climate for continued learning.

UPGRADING AND TRADE EXTENSION: Opportunities exist in all Regional Schools for upgrading basic skills, and knowledge of selected occupations, leading workers to improved productivity, advancement, and increased income.

PRE-APPRENTICESHIP: This training is provided to individuals desirous of entering a designated trade. By completing a pre-apprentice training programme a person becomes more readily acceptable for employment as an apprentice.

APPRENTICESHIP: This training is provided for individuals who have been indentured as apprentices and who are required to return to school to receive instruction in phases of their work that are not usually taught "on-the-job."

REGULAR FULL-TIME DAY COURSES

Pre-employment and Upgrading Courses:

- Basic Training for Skill Development
- Commercial —Advanced Options
- Commercial —General
- Commercial —Secretarial
- Electronics Technician
- Engineering —Marine and Stationary
- Marine Engine Repair

The British Columbia Purchasing Commission
Mr. R. G. McKee
Chairman

TERRACE

British Columbia

Terrace is on the northern Canadian National Railway Trans-Canada route. It is also served by British Columbia Yellowhead Highway #16 and #25. It has a fully modern airport and is the halfway point for the Whitehorse-Vancouver air route. Specifically, Terrace is 90 miles east of Prince Rupert, 357 miles west of Prince George, 26 miles north of Kitimat, and 425 air miles northwest of Vancouver. It is on the 54 degree 30 minute parallel so it is not quite halfway between the southern and northern boundary of British Columbia. It has as its seaports Kitimat and Prince Rupert and for its interior all of northern British Columbia and central Canada. In particular, the area east of the Alaska Panhandle will be serviced through Terrace when the Cassiar-Stewart Highway is completed.

Terrace is strategically located in a region rich in natural and human resources. Combined, they offer a virtually unlimited scope for future development.

DEPARTMENT OF PUBLIC WORKS
PROVINCE OF BRITISH COLUMBIA

The Administration and Classroom Buildings, Workshops,
Boiler House and Central Stores —all designed and supervised
by the Department of Public Works, Province of British Columbia.

The Honourable W. N. Chant
Minister
