Statement of Philosophy

General Responsibility

Northwest Community College assumes general responsibility for all the valid educational and training services that are beyond the responsibility of the School Districts that exist in the College region.

Decentralization

Northwest Community College is committed, wherever it is financially and physically feasible, to decentralize educational and training services so that the opportunities are equitably shared by residents of the regions. The College believes that access to these services can be facilitated where appropriate by utilization of modern technological development in education.

Provincial Responsibility

Northwest Community College's primary concern is with serving the needs of residents in its region. However, the College recognizes that, as part of the provincial educational system, it has a responsibility wherever possible to serve special needs of residents outside the College region.

Assessment of Needs

Northwest Community College recognizes its mandate to provide for educational and training needs of all people in the College region by striving to facilitate access to the appropriate educational and training programs and services. To this end, the College actively seeks input from all segments of the community; it is especially responsive to recommendations made by advisory committees established by the College.

Relationship with other organizations

When deemed appropriate, Northwest Community College co-operates with other educational and training organizations, both within and outside the region, in order that the best services possible might be provided.

Presentation of Services

Northwest Community College strives for excellence in all the services it provides. It is committed to development of delivery systems that provide educational and training services for the people where they live and work. When considering the delivery systems to be used, the College is concerned not only with cost effectiveness but also with the quality of instruction.

Community Education

Northwest Community College recognizes its responsibility to aid in the development of citizens who can participate fully and effectively in society in general and their individual communities.

Governance of College

The governance and operation of Northwest Community College reflects the legitimate concerns of all elements within the College and in all the communities it serves.

Accountability

Northwest Community College recognizes that it is a public institution utilizing public money for its operation, and that therefore it must be accountable to the public in everything it does. To this end, the operations of the College are open to public scrutiny. The College recognizes its responsibility to ensure that proper evaluation takes place in everything it does and that self-renewal is an ongoing obligation.

Addiction Resource Worker Program

GENERAL INFORMATION - Alcohol and Drug Abuse has a debilitating impact on personal and community life.

As community awareness of drug problems grows, so does the demand and need for qualified workers in the drug field. The Addiction Resource Worker Program is unique in its design, delivery and goals.

DESIGN - The Addiction Resource Worker Program is a program designed by rural communities with rural communities in mind. The Course has a Native Cultural component that enables students to more freely understand the strengths of the Indian Communities.

Four of the courses are university transferable and two are College transferable and could be applied to other related fields.

DELIVERY - It is a compact, 10 month program, geared for the mature student who has some knowledge and/or experience in the addictions field.

GOALS:

- To provide training in the addiction field at the para-professional level
- To prepare individuals from the region to become drug and alcohol counsellors
- To help meet the demand for well trained Native Addiction Counselors

Dates and Location

The Addiction Resource Worker Program Commences September, 1988 and continues until June, 1989. It is offered in Hazelton, B.C. This includes a two month practicum in May and June at a location in B.C., Alberta, or the Yukon

Teleconferencing Courses

UNIVERSITY TRANSFER COURSES BY AUDIO TELECONFERENCING

AUDIO Teleconferencing links students in Hazelton, Houston, Kitimat, Prince Rupert, Smithers, and Terrace with their instructor. Everyone can hear and speak to each other in the 'bridging' of microphones and loudspeaker units. Classes include lectures, audio-visual presentations and interactive seminars. Opportunities will be available weekly for individual discussions by telephone between student and instructor. The following courses start the week of **SEPTEMBER 6, 1988** and run for fifteen weeks.

Tuition is \$24.00 per credit. Continuing courses in each subject will begin in January 1989.

BIOLOGY 110 — 3 credits

A first year university transfer course in Biological Sciences, this course teaches basic concepts in Biology and laboratory techniques. First semester emphasizes the origins of life, biochemical pathways, and structure and function in multicellular organisms. Laboratories are held in Terrace for a maximum of three weekends per semester. As this is an audio teleconferencing course, innovative instructional techniques and methods are utilized to make this an exciting way to learn Biology.
